SKILLS

Java – Python – JavaScript –
TypeScript – HTML – CSS – Angular –
React – Git – GitHub – Linux –
SpringBoot – Swagger – Docker –
MongoDB – MySQL – PostgreSQL –
Backend – Frontend – Microsoft 365 –
Metodologías ágiles

EDUCATION

Universidad ECCI

Computer Development Technologist – August 2020
Participated in an IoT seminar focused on IPv6, where the CISCO Packet Tracer program was used to design and develop the final project layout. All aspects related to home automation had to be specifically programmed for its implementation.

Universidad Politécnico Grancolombiano

Software Engineering – Ongoing
Pursuing a degree that integrates the design, development, and implementation of quality software. I focus on solving complex problems and innovating by using advanced methodologies to create efficient and secure technological solutions.

Universidad del Bosque – MINTIC

Diplomado in Software Development – December 2021
Completed a diploma program that covered cycles of Programming Fundamentals, Advanced Programming, Software Development, and Web Application Development. This program provided me with a solid theoretical and practical foundation in software and web application development.

WORK EXPERIENCE

Colombia Móvil – Sales Advisor

January 2022 – January 2024
Worked in the Networks and Telecommunications area as a customer service specialist, providing support and making sales. This experience enhanced my communication and problem-solving skills.

Acer Latam – Sales Advisor

May 2017 – July 2021
Worked as a Sales Advisor, providing guidance on software and hardware. I successfully increased sales and improved customer satisfaction, developing key commercial and technological skills.

SOFTWARE PROJECTS

Generic Store

A sales system that uses Angular for the frontend, Java with Spring Boot and microservices for the backend, and Docker for container management, supported by relational and non-relational databases. It offers a scalable platform for sales, inventory, and data analysis.
